Abstract

The SHAMISEN-SINGS website has been created with the purpose of disseminating the goals and results of the CONCERT-funded SHAMISEN-SINGS project. Moreover, it allows project partners to work more efficiently (via intranet) up-loading and using documentation in shared areas. Further development of the web will allow working with SHAMISEN-SINGS stakeholders (professionals and general public).

Creation of the website

In mid-January 2018, following consultation with project collaborators, the website for the **SHAMISEN-SINGS project**, created by Alex Albert (ISGlobal, Radiation programme) was put online and shared with project partners and experts.

A link to the website was also published in the Air2 Bulletin – Special Issue 3 (Feb 2018) which includes the SHAMSEN-SINGS project description and presentation for Radiation Protection Research professionals (Figure 1):

![Figure 1. Description of the SHAMISEN-SINGS project published with link to the web site.](image)

Structure of the website

The current version of the SHAMISEN SINGS website has the following general structure:

There are five pages in the menu (switching to each page by pressing on the corresponding title in the Menu): HOME, PROJECT, WORKPACKAGES, NEWS, and PARTNERS (Figure 2).

The upper right corner has the following buttons: to **contact**, link to the **Radiation programme** of ISGlobal and login to personal **account** (for intranet use).

The header contains three logos :SHAMISEN SINGS, CONCERT and EU.
The main text of the selected page appears in the middle of the page, below the menu.

The bottom of the page is used to display news published by ISGlobal (Radiation programme on twitter) and other general news and information about the project:
Description and purpose of the different sections

1. HOME
The HOME page contains general information about the SHAMISEN SINGS project, namely the background, motivation and objectives:

2. PROJECT
This section provides a brief description of the project
3. WORKPAGES
This section lists the SHAMISEN-SINGS WPs and their inter-relations (Project PERT Chart):

It also provides a description of each WP and Task, including list of Partners and experts involved, background, objectives, approaches:
4. NEWS
This section is dedicated to dissemination of news about the project and related events.

5. PARTNERS
This section provides a list of the SHAMISEN-SINGS partners and experts with links to their organisations.
6. **INTRANET (Account)**

This area of the website, with use restricted to partners and experts involved in the project WPs and tasks, provides a repository of documents (both concerning the project and other documentation and material necessary for the correct and efficient execution of the project), workspace for Partners (by WP, task, as well as overall) and a forum for discussion. Access is via personal accounts that give access to each participant and expert to the areas of concern/interest to him/her.

Further developments of the website

A section for stakeholders – including a Forum and a document repository is under preparation, similar to that developed for the previous OPERRA-SHAMISEN project. It will include an interactive section for different groups of project stakeholders, in order to elicit their opinions, comments and evaluations of the specific questions elaborated during the progress of the projects’ tasks.
